

Arpita Godbole

San Diego, CA | (760) 783-9291 | arpitavingodbole@gmail.com | [linkedin.com/in/arpitagodbole04](https://www.linkedin.com/in/arpitagodbole04)

SUMMARY

Incoming M.S. student with hands on experience building ML pipelines, cloud data platforms, and BI dashboards. Skilled in Python, SQL, and cloud infrastructure (GCP, Microsoft Fabric), with a track record of turning raw data into actionable business and research insights.

EDUCATION

University of California, San Diego

Sept 26- Dec 27 (Expected)

M.S. in Data Science (Incoming)

California State University, San Marcos

Aug 2022 – May 2026

B.S. in Computer Science, Minor in Data Science | GPA: 3.7 | Dean's List (All Semesters)

Cornell Tech — Machine Learning Foundations Certificate

Issued Jul 2025

EXPERIENCE

Data Analysis Intern (IT Department), Baker Electric

May 2026 – Aug 2026

- Developed a Power BI analytics dashboard to evaluate project profitability, labor-hour variance, margin performance, and change order impact across completed construction projects.
- Supported Microsoft Fabric data platform implementation through data integration, validation, testing, and troubleshooting across enterprise data sources.
- Queried and validated project, financial, and operational data using SQL to identify inconsistencies and improve reporting reliability.
- Created SQL database mappings, application workflows, functional specifications, and technical documentation to support application development and maintenance.

AI Fellow, Break Through Tech

May 2025 – Mar 2026

- Selected from 1,500+ applicants nationwide for Cornell Tech's AI Studio fellowship program.
- Built an end-to-end machine learning model for skincare startup Skinterest, creating a personalized, inclusive dataset by analyzing product trends, ingredients, and customer sentiment.
- Completed 200+ hours of applied machine learning training in deep learning, feature engineering, and model evaluation.

Student Researcher, Data Breach Analysis in California

May 2024 – Aug 2024

Sponsored by Leidos

- Analyzed 1,000+ California data breach records, applying statistical analysis and visualization in Python (Pandas, NumPy, Jupyter Notebook).
- Built machine learning models like Naïve Bayes to predict cybersecurity risk and identify the data types most susceptible to breach.

PROJECTS

Cloud Healthcare Analytics & Risk Prediction System

Jan 2026 – May 2026

- Designed and deployed a healthcare analytics platform on Google Cloud Platform with Terraform-managed infrastructure as code.
- Built an end-to-end machine learning pipeline in Python using Vertex AI to predict health risk and identify hospitals with higher Medicare cost exposure.
- Developed REST APIs with Cloud Run and integrated BigQuery, Cloud Storage, Docker, and Kubernetes for scalable data processing and monitoring.
- Managed source control and collaborative development using Git/GitHub.

Virtual Reality Solar System Orbit Simulation

Aug 2025 – Dec 2025

- Developed an immersive VR solar system simulation in Unity for Meta Quest 3.
- Implemented scientifically accurate planetary orbit and rotation logic in C#.
- Optimized lighting, assets, and performance for VR rendering.

SKILLS

Languages: Python, SQL, Java, C++, C#, JavaScript, HTML/CSS

Data & ML: Pandas, NumPy, TensorFlow, PyTorch, Scikit-learn, Vertex AI, BigQuery, Jupyter Notebook, Matplotlib

Cloud & DevOps: Google Cloud Platform, Azure, Microsoft Fabric, Power BI, Docker, Kubernetes, Terraform, Git/GitHub, Snowflake

Tools: VS Code, IntelliJ IDEA, Unity, SSRS/SSIS, REST APIs, Microsoft 365, Jira
